

# Installation Manual

1. To install the module "Fast order" go to it's page on magento-connect service.

- 2. Log in to the magento connect.
- 3. Click on the button "Install now".

4. Select the checkbox "I agree to the extension licence agreement". Click on the button "Get extension key".

5. Click on button "Select key". Copy the extension key to clipboard ("Ctrl-C" key combination can be utilized).

The screenshot shows the 'Fast order' extension page. On the left is a large preview image of the extension's logo, which features a stylized 'W' with 'WEB4PRO' and 'Internet Solutions for Business' above it, and a red stopwatch icon with the text 'FAST ORDER' below it. Below the main preview are four smaller thumbnails showing different views of the extension's interface. On the right side, the extension is titled 'Fast order' and has a 3.6/5 star rating and a popularity score of 4664. It is marked as 'FREE'. The 'Platform' is set to 'Community'. A 'Get Extension Key' button is visible, along with a checked checkbox for 'I agree to the extension license agreement'. At the bottom, there are links for 'Developer Info', 'Profile', 'Email', 'Support', and 'Extensions'.

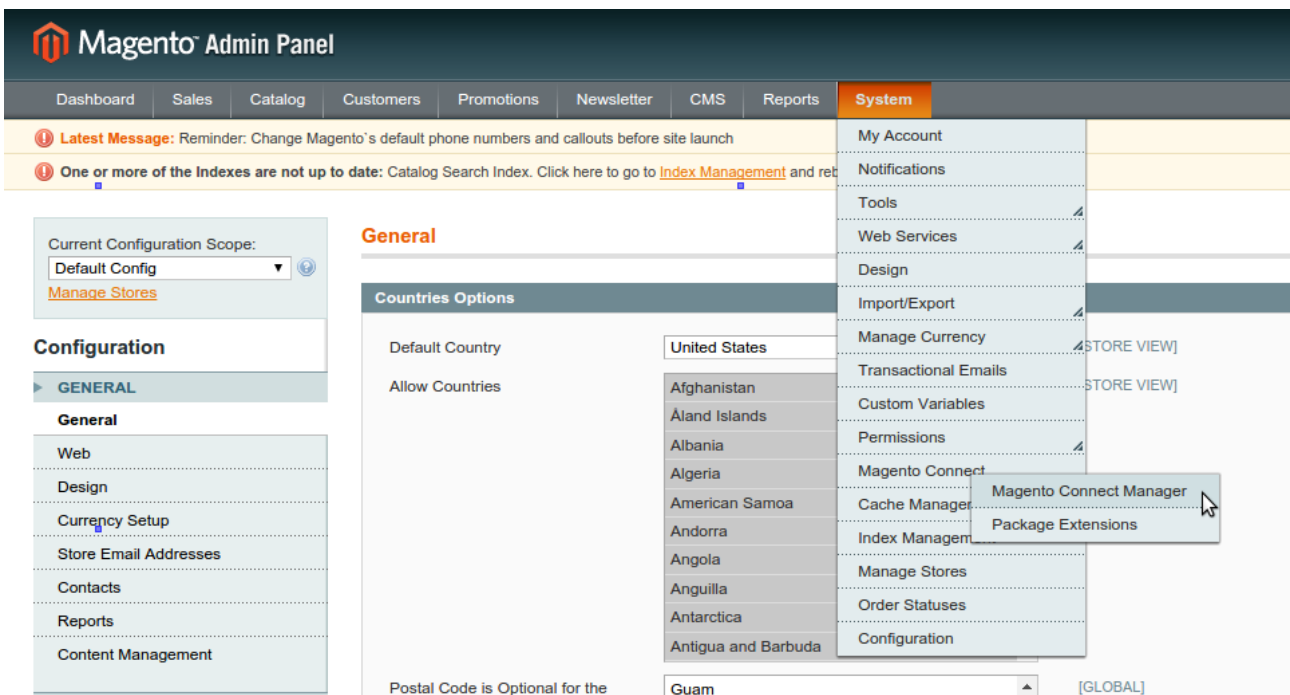

This screenshot is similar to the one above, showing the 'Fast order' extension page. The 'Get Extension Key' button has been replaced by a 'Select Key' button. A red arrow points to the URL 'e.com/community/Web4pro\_Fastorder' which is highlighted in a blue box. The rest of the page, including the preview images, ratings, and navigation links, remains the same.

6. Make sure that your site directories:

- app/code/community
- app/design/adminhtml/default/default/template
- app/design/adminhtml/default/default/layout
- app/etc/modules
- app/design/frontend/base/default/layout
- app/design/frontend/base/default/template
- skin/frontend/base/default/css

have permissions 0775.

7. Go to your store Magento admin panel. System -> Magento Connect.

8. Input your login and password.

### Log In

Please re-enter your Magento Administration Credentials.  
Only administrators with full permissions will be able to log in.

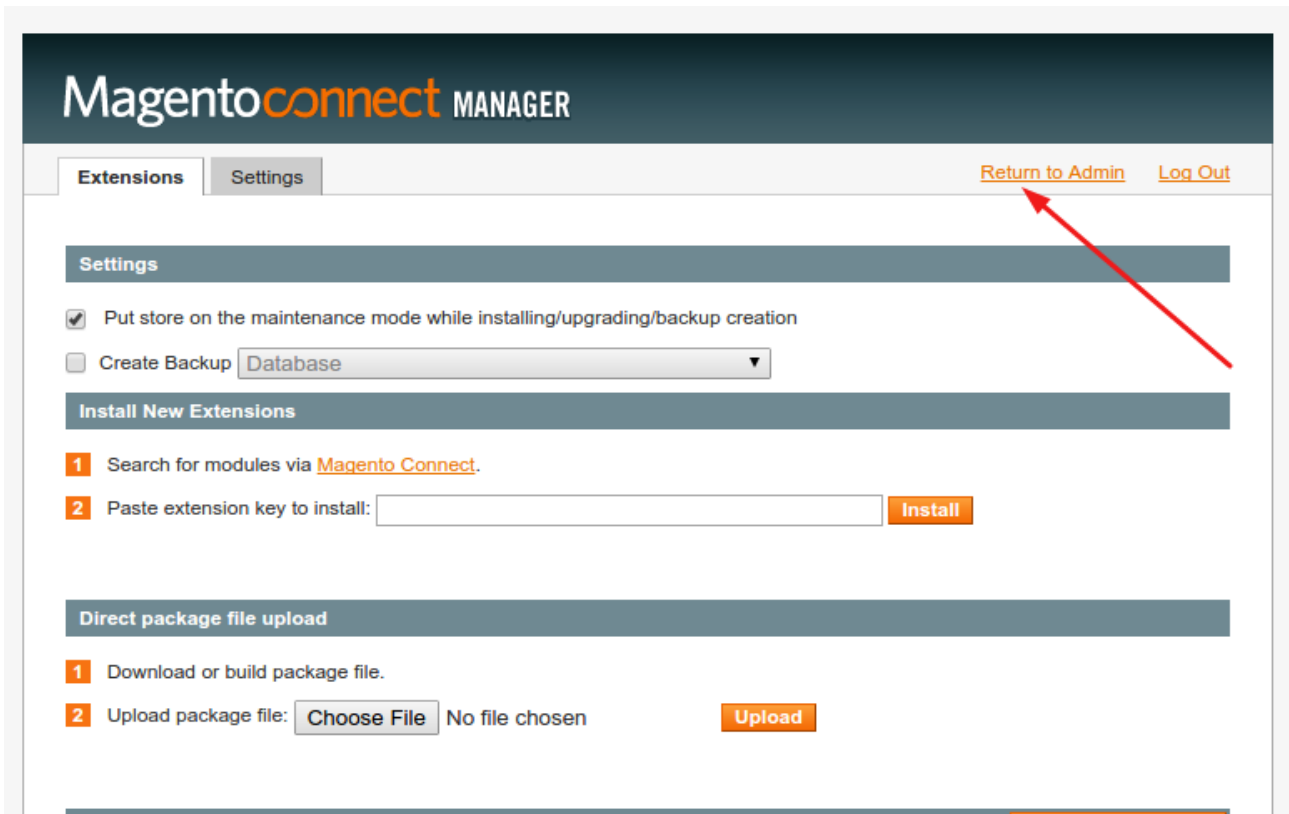

Username:

Password:

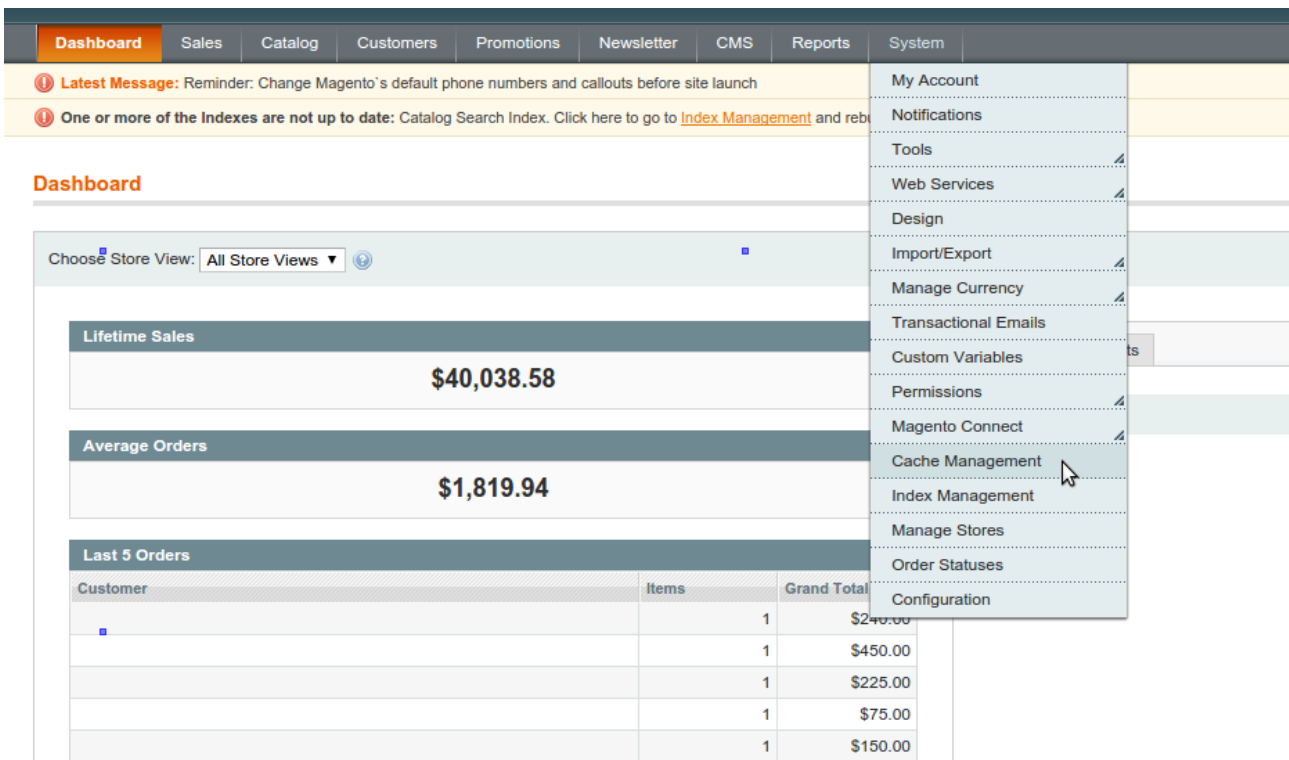

8. Paste the extension key to input field in "Install Extensions" tab and press "Install" button.  
If you have the archive with the module you should click button «Choose file», select the archive and click button «Upload».

The screenshot shows the Magentoconnect MANAGER interface with the "Extensions" tab selected. The "Settings" section includes a checked checkbox for "Put store on the maintenance mode while installing/upgrading/backup creation" and an unchecked checkbox for "Create Backup" with a "Database" dropdown menu. The "Install New Extensions" section contains a step 1 instruction to search for modules via "Magento Connect" and a step 2 instruction to "Paste extension key to install:" with an input field and an "Install" button. A red arrow points to the input field. The "Direct package file upload" section contains a step 1 instruction to "Download or build package file" and a step 2 instruction to "Upload package file:" with a "Browse..." button, the text "No file selected.", and an "Upload" button. A red arrow points to the "Browse..." button, and another red arrow points to the "Upload" button.

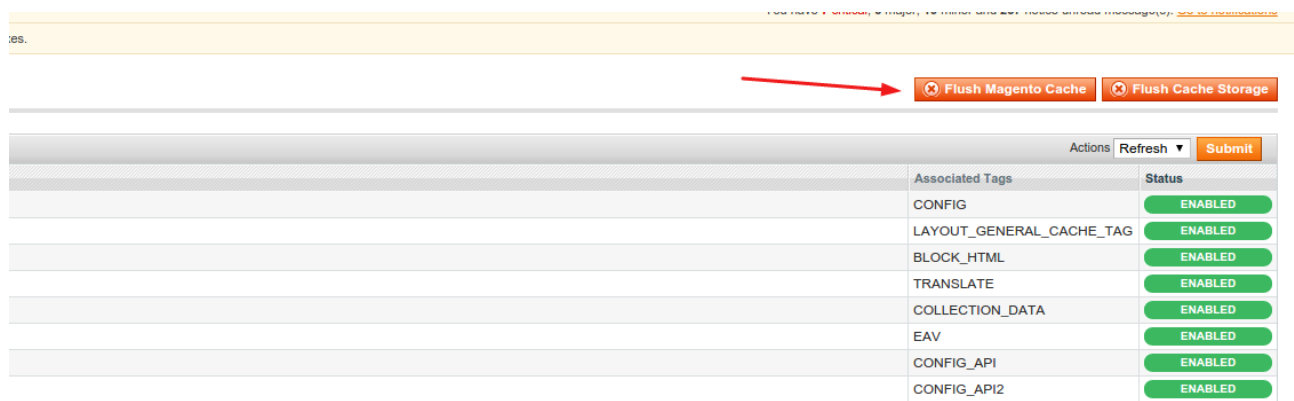

6. Return to your store Magento admin panel

7. Go to System -> Cache Management.

8. Click on button "Flush Cache Storage".

The screenshot shows the Magento Admin Cache Management interface. At the top, there are two buttons: "Flush Magento Cache" and "Flush Cache Storage". A red arrow points to the "Flush Cache Storage" button. Below the buttons is a table with the following data:

Associated Tags	Status
CONFIG	ENABLED
LAYOUT_GENERAL_CACHE_TAG	ENABLED
BLOCK_HTML	ENABLED
TRANSLATE	ENABLED
COLLECTION_DATA	ENABLED
EAV	ENABLED
CONFIG_API	ENABLED
CONFIG_API2	ENABLED

8. Log out and then log in to your Magento admin panel.
